

EXPRESS SCRIPTS®

Questions & Answers about your new ♥CVS pharmacy® and *Walgreens* three-month supply network

1. What is a CVS and Walgreens three-month supply network?

It's a feature of your prescription plan managed by Express Scripts. With it, you have two ways to get up to a three-month supply of your long-term medications (those drugs you take regularly for ongoing conditions). You can conveniently fill those prescriptions either through home delivery from the Express Scripts PharmacySM or from any CVSTM, Walgreens[®] or Duane ReadeTM pharmacy.¹

2. How many CVS and Walgreens pharmacies are available to me?

There are more than 18,000 CVS and Walgreens pharmacies. To locate one, visit express-scripts.com and click "Prescriptions," then "Find a Pharmacy"; participating CVS and Walgreens pharmacies will be noted in your search results.

3. What happens if I keep filling my long-term medication like I'm doing now?

Per your plan, if you keep filling a one-month supply instead of a three-month supply, or if you're using a non-CVS or non-Walgreens pharmacy to fill your long-term medication, you'll pay either a higher cost or the full cost for your medication.

4. What does "full cost" mean?

"Full cost" is the actual cost of your medication. For example, the actual cost of the medication might be \$75, but if you have a copayment or coinsurance, your payment might only be \$20. "Full cost" means that your payment would be the entire \$75.

5. What is the advantage of getting up to a three-month supply vs. a one-month supply?

By getting up to a three-month supply, you'll make fewer trips to the pharmacy, and you'll only need to make one payment every three months. Also, there's usually a savings for getting one three-month supply vs. three one-month supplies at retail.

Depending on your plan, after either the second or third time you purchase a one-month supply of a long-term drug at a non-CVS or non-Walgreens network pharmacy, you could pay a higher cost or the entire cost.² But you can avoid paying more by choosing a three-month option — either through home delivery from the Express Scripts Pharmacy or from any CVS or Walgreens pharmacy. You will pay the same copayment for your three-month supply whether you fill through home delivery from the Express Scripts Pharmacy or from a CVS or Walgreens pharmacy.³ Find out more at express-scripts.com/KyleAndNick.

6. How do I get a three-month supply of my medication?

You can have the Express Scripts Pharmacy deliver it (with FREE standard shipping) by visiting [express-scripts.com/90day](https://www.express-scripts.com/90day). You can also fill your prescription at any CVS or Walgreens pharmacy.

7. What is the difference between long-term and short-term drugs?

Long-term drugs, also called maintenance medications, are those you take on an ongoing basis, such as to treat high blood pressure or high cholesterol. Short-term drugs include antibiotics and other medications that you take for short periods of time. Under your plan, you can fill short-term prescriptions at any participating retail pharmacy in your network.

8. I already use home delivery from the Express Scripts PharmacySM to get my long-term drugs. Do I need to change anything?

No. If you're using home delivery services from the Express Scripts PharmacySM for your long-term drugs, you may already be saving money under your plan. Congratulations! You don't need to do a thing.

¹ Duane ReadeTM pharmacies are owned by Walgreens and are included in your plan's pharmacy network for long-term medications.

² The medications affected by this plan limit may change. To find out whether your medication's price is affected by these plan limits, visit [express-scripts.com](https://www.express-scripts.com) and select "Price a Medication" from the "Prescriptions" menu after you log in. After entering your medicine, click "View coverage notes" on the results page. If you are a first-time visitor to our website, please take a moment to register and have your member ID number handy. If the cost of a medication at a retail pharmacy is lower than your plan's retail copayment or coinsurance, you will not pay more than the retail pharmacy's cash price, regardless of the number of times you purchase the prescription. In some cases, this price may be less than either your standard retail or mail copayment or coinsurance.

³ Price may vary slightly for coinsurance plans.

Express Scripts manages your prescription plan.
